INTRODUCING
THE SOLÉ SYSTEM

SOLÉ

LOUVERED ROOF SYSTEM

POWERED BY
One touch control

> *Designed for those who want the best of all worlds — the SOLÉ opens and closes with the touch of a button, adapting instantly to weather and lifestyle so you never have to choose between shelter and sky.*

WHY SOLÉ

VERSATILE OPERATION
Fully closed for rain or blazing heat. Partially open for dappled shade. Fully open to soak in the sun and sky. One remote, infinite settings — complete control over your outdoor experience.

DURABLE CONSTRUCTION
Precision-extruded aluminum framing and louvers engineered to last decades. Every component tested to withstand years of daily outdoor use without warping, cracking, or fading.

ENGINEERED FOR EXTREME WEATHER
Structurally rated for high-wind environments and extreme weather conditions. When closed, the integrated gutter beam channels rain and snowmelt cleanly away — built to perform through every season, year after year.

ADVANCED DESIGN
A stunning architectural structure that complements your home rather than competing with it. Available with integrated LED lighting, fan beams, and optional zoning — a true outdoor room.

LOW MAINTENANCE
The powder-coated aluminum finish resists corrosion, UV degradation, and salt air. An occasional rinse is all it takes — spend your time enjoying your space, not maintaining it.

ANY HOUR. ANY WEATHER.

The SOLÉ transforms your outdoor space into a year-round living room — as breathtaking after dark as it is on a perfect sunny day.
